Editorial

Dear ProVia Customer,

You have in your hands the latest edition of the ProVia catalogue. This is a special year for ProVia as we celebrate our fifth anniversary. Over the last five years our network has expanded significantly. Our range of budget, no-frills commercial vehicle spares has filled a substantial demand from the aftermarket that was previously ignored. With parts designed to fit to aftermarket needs with no compromises on safety. ProVia has gain space in the commercial vehicles sector. In 2019, we hit a major milestone with the installation onto a commercial vehicle of ProVia part number one million. Since then, both our catalogue and our global reach have continued to expand, and we were very proud that part number two million was installed early in 2021.

Our successes over the past five years have been built upon the trust placed in us by you for which we are very grateful. The last year has been difficult for everyone and only with your support has the ProVia name been able to thrive and continue its expansion.

You may note this catalogue is bigger than the editions that preceded it. ProVia continues to grow, offering more parts, more product lines and more x-references than ever before. Last year we were proud to feature 1,800 OEM x-references; this year, that number is fast approaching 3,000. New for this edition we are introducing a Pneumatic Clutch Actuator product group, expanding our Brake Chamber Cam, Air Dryer and Clutch Servo range. We are also pleased to take this opportunity to preview the launch later in 2021 of all-new Air Compressors, Cabin Levelling Valves, Wheel Speed Sensor Cable extensions, and a Park Release Emergency Valve (PREV).

We encourage you to check out for latest news on our webpage www.provia-auto.com. Thank You for your support – and watch this space!

ProVia Team

ProVia is a commercial vehicle budget spare parts brand that delivers reliable performance, with no frills, yet no compromise on quality or safety for commercial vehicles.

ProVia is available to distributors, workshops and fleet operators serving the commercial vehicle industry worldwide.

ProVia™

Brake Chamber

With ProVia's brake chamber, the air pressure is converted efficiently into mechanical output force to brake the vehicles. ProVia provides customers another cost attractive and TÜV certificated option of Brake Chamber with outstanding performance and trustworthy operation.

Key Features

- Up to 1 million life cycles for chamber
- 96 hours corrosion resistance
- Working temperature: -40 °C ... +80 °C
- Maximum working pressure: 10.2 bar

Standard & Quality

- TÜV and SAE standard
- Stroke length 57.0/63.5/76.2 mm

Feature	OE Original	ProVia	Aftermarket Average*

Spring Brake Actuator

Spring brake actuators consist of both a service and a parking chamber. The air pressure applied into the service chamber is converted into mechanical output force. The parking chamber provides the mechanical braking force to park the vehicle. In addition, a mechanical release arrangement is provided in the unit to release the parking brake after brake failure.

Key Features

- With only few variants, ProVia is able to serve an impressive range of more than 200 OEM cross references
- Much longer lifetime and better corrosion resistance reduces the replacement rate of this component compared to other budget parts
- Internal Breathing Valve (IBV) provides clean and dry air protection against aggressive environmental conditions extending the lifetime of the device. Most competitor chambers breathe with external holes in the rear housing

Standards & Quality

- Max. Operation pressure up to 13 bar
- Stroke length 57 / 65

Feature	OE Original	ProVia	Aftermarket Average*
Corrosion resistance (hours)			
Leakage -40 °C (cm ³ / min)			
Leakage +80 °C (cm ³ / min)			

* Average low specification alternative product

Double Diaphragm Spring Brake Actuator

Double diaphragm spring brake actuator (DDSB) consists of service brake chamber and a spring brake chamber. The air pressure applied into the service chamber is converted into mechanical output force. The spring chamber provides the mechanical braking force to park the vehicle. In addition, a mechanical release arrangement is provided in the unit to release the parking brake after brake failure. ProVia offers a cost attractive, high performance spring brake actuators for commercial vehicles.

About

- ProVia DDSB have an universal design to cover a wide range of OE applications
- Offers a significantly longer lifetime in terms of operating cycles and better corrosion resistance compared to many other budget actuators

Key Features

- Up to 1 million lifecycles for service chamber, up to 200,000 cycles on park chamber
- 96 hours corrosion resistance
- Working temperature: -40 °C to +80 °C
- Crimp design on spring brake chamber for customer safety
- Variants with yoke available

Standards & Quality

- Complying with required standards (TÜV, SAE, QCT)

The new ProVia pipe extension provide many benefits:

- **High standard of safety:** clear identification of parking and service ports by off-set positioning; avoiding incorrect connection.
- **Cost savings:** fast assembly due to the connections being led out from a cramped installation position. Therefore: the brake hose is easily connected.
- **Easy to handle:** fits even in restricted installation conditions. One of the most compact designs (combination of cylinder and pipe extension) on the market.

ProVia pipe extension

Brake Pads

Brake pads convert the kinetic energy of the vehicle to thermal energy by friction. The ProVia brake pad portfolio covers the most common air disc brakes in the market. Pad kits partially enriched by accessories ensure a safe fit in major applications in the market.

Key Features

- Universal fit for one brake/size type
- Portfolio consisting of various pad kits covering major brakes in the market as KNORR, WABCO, Meritor, Haldex, Bendix, BPW, TEVES and over 350 OE references

Standards

- Validation according to ECE-R90 standards. In addition to ECE-R90, the brake pads undergo diverse additional tests including the proving of braking performance in several situations (e.g. high stress), targeting high comfort (e.g. pedal feedback) and ensuring reliability and lifetime of disc and pad

Air Dryer

Air dryers are installed between the air compressor and the reservoir on commercial trucks and buses. They are designed to filter out humid air and other contaminants before they are able to reach the vehicle's downstream pneumatic systems.

Key Features

- Universal design which covers multiple OE applications
- Produced in Europe for global market needs
- Installed with a ProVia cartridge (M39×1.5 right-hand thread, easy assembly and disassembly)
- High corrosion resistance thanks to surface protection
- Separate ProVia heater available as an option

Standards & Quality

- Working pressure: 13 bar

Feature	OE Original	ProVia	Aftermarket Average*
Security valve opening pressure (bar)			
Cartridge drying performance			
Corrosion resistance (hours)			

* Average low specification alternative product

Air Processing Unit

The ProVia air processing unit (APU) is a two-part system comprising a ProVia air dryer and a ProVia multi-circuit protection valve. It will dry and clean air supplied by the compressor, adjust pressure for the respective load circuits and provide overload protection.

Key Features

- Secures the pressure of the individual load circuits relative to each other and relative to atmospheric pressure
- In cases of circuit failure, will maintain pressure in the other circuits at the prescribed level. Subsequent operation of the system will allow pressurize circuits to be refilled to the opening pressure of the failed circuit
- Longer life component with significantly better drying performance and reliability when tested against other budget brands

Standards & Quality

- Max. operating pressure ≤13 bar
- Thermal operating range -40 °C to 80 °C

Feature	OE Original	ProVia	Aftermarket Average*
Security valve opening pressure (bar)

Heater

A heater can be fitted to an air dryer and air processing unit as an option. ProVia recommends the use of a heater as part of the air dryer system, ensuring the system operates at a normal operating temperature and to protect it in low temperature environments.

Key Features

- Separate heaters can be ordered as an option
- Produced in Europe for global market needs
- High power efficiency
- Designed to fit between heater and body connection
- 70W

Cartridge

Inside the pneumatic system, the air dryer cartridge is an important, safety-relevant component. Installed between the compressor and reservoirs a cartridge is the first line of defense protecting a vehicles air system.

About

- Outstanding performance in the budget cartridge business thanks to high quality moisture absorbing material
- ProVia is able to serve multiple OEM cross references in different vehicle applications
- ProVia cartridges pass to all long distance vehicle applications
- Recommended mainly long distance operation without much stop-and-go, braking, etc.
- Different cartridges based on water /oil separation, drying performance and thread size

Key Features

- Cartridges prevent humid air entering into the system protecting it from corrosion and freezing

Multiple Circuit Protection Valve

The multiple circuit protection valve (MCPV) from ProVia provides pressure protection in multi-circuit braking systems. Used in a truck braking system, an MCPV distributes compressed air, adjusts pressure to the respective circuits and protects healthy circuits in cases of circuit failure.

Key Features

- Wide functionality including bleedback utility, pressure-limiting valve, and a bypass function between ports 21 and 22
- Fully compatible with ProVia air dryers
- Sensor-equipped for pressure level monitoring

Standards & Quality

- Max. operating pressure ≤13 bar.
- Thermal operating range for continuous operation: -40 °C to 80 °C
- Opening pressure: 9.0 bar (circuit 1+2), 7.5 bar (circuit 3+4)
- Closing pressure: ≥7.0 bar (circuit 1+2), ≥4.5 bar (circuit 3+4)
- Pressure limiting: 10.0 bar (circuit 1+2), 8.5 bar (circuit 3+4)

Quadruple Circuit Protection Valve

The ProVia Quadruple Circuit Protection Valve (Quad) serves as a distribution point securing pressure in a multi-circuit vehicle air braking system. In the case of one circuit failing, pressure in the other circuits will be maintained at a prescribed level. Subsequent operation of the system will allow working circuits to be refilled to the opening pressure of the failed circuit.

Key Features

- In normal operation functions in a similar manner to a manifold block
- Controlled bypass functionality increases service brake circuits filling speed
- Different variants with predefined opening and closing pressure, for different quantity of circuits and ports

Standards

- Max. operating pressure: 13 bar
- Thermal operating range: -40 °C to 90 °C
- Opening / closing pressure: variant dependant – wide range of OE numbers covered
- Two types available: QUAD (5 ports) and MP7 (7 ports)

Pressure Limiting Valve

Pressure limiting valves help ensure system pressures are kept below a desired upper limit and maintain a set pressure in relevant parts of the circuit. Most pneumatic systems are designed to operate within a preset pressure range. Without controlling or limiting these forces, power components (and expensive equipment) could be damaged. The valves prevent the buildup of excessive pressure or vacuum which can unbalance the system. They are the safeguards which limit maximum pressure in a system by releasing it when it gets too high.

Key Features

- Universal design to cover multiple OE applications: serving around 100 OEM cross references with 28 variants
- Jointly developed in Europe and India for global market needs

Standards

- Normal operating pressure of 10 bar, with maximum of 20 bar
- One mounting hole of Ø 8.6 mm to accommodate M8 stud
- Two mounting holes of Ø 8.6 mm with 56 mm pitch

Compressor Cylinder Head

The range now includes a replacement cylinder head to control airflow through the compressor, compatible with a wide range of trucks and buses in the heavy, medium and light vehicle markets.

Key features

- Universal design compatible with a wide range of global OE applications in diverse commercial vehicle market sectors
- Manufactured from superior steel grades for better heat-exchange performance and extended product life
- Designed for high-temperature applications
- Superior cooling performance to budget brand alternatives
- Enhanced surface protection and excellent durability

ProVia™

Chassis Levelling Valve

A chassis levelling valve from ProVia provides suspension control for vehicles fitted with air springs. It precisely modulates compressed air in the suspension bellows as a ratio of the vehicle's load. The chassis levelling valve ensures a constant ride height, charging the air suspension during loading and venting when unloading.

Key Features

- Push-in coupling fittings in PRO 006 002 0 & PRO 006 004 0 variants
- Supply & delivery (bellow) ports include integrated air filters
- High corrosion resistance, as demonstrated in the 96h Neutral Salt Spray Test
- Highly reliable, long-life durability compared to budget alternatives

Standards & Quality

- In addition to temperature & endurance tests, the chassis levelling valve undergoes diverse additional investigation
- Integrated air filters avoid contamination and ensure excellent functionality

Cabin Levelling Valve

A ProVia cabin levelling valve improves driver comfort by maintaining a precise cab position. For cabs fitted with an air suspension system, the CLV will preserve the correct attitude, intelligently adapting to cabin load and a wide range of road conditions.

Key Features

- Reliable and robust ceramic technology with polymer housing. Excellent corrosion resistance, proven in 96-hour neutral salt-spray tests, offering superior longevity to other budget brands
- Operating pressure: 11 bar
- Max. operating pressure: 14 bar

ProVia™

Rotary Slide Valve

A rotary slide valve controls the raising and lowering of air-suspension based vehicles with a hand lever. ProVia offers a robust, cost attractive, high performance rotary slide valve.

Key Features

- High durability based on robust material reduces the replacement rate of this component compared to other budget parts
- High corrosion resistance proven in the 96h Neutral Salt Spray Test
- Low leakage rates for long durability

Clutch Servo

The clutch servo enables the driver to disengage and engage the clutch with minimum clutch pedal effort. The clutch servo is a pneumatically assisted hydraulic clutch-actuating device that enables sensitive and accurate actuation of the clutch in the vehicle.

Key Features

- High corrosion resistance proven in the 96h Neutral Salt Spray Test
- Low leakage rates for reliable product performance and consistent quality

Pneumatic Clutch Actuator

The pneumatic clutch actuator is used in commercial vehicles with automated manual transmission units. Its function is to apply the clutch automatically (as commanded by gearbox ECU), which effectively eliminates any jolting or surges and consequently allows for a smooth clutch operation when pulling away, stopping and gear changing.

Key Features

- Thermal operating range: -30 °C to 90 °C
- Low leakage rates for reliable product performance and consistent quality
- Tightness according to IP67 with appropriate connection
- With integrated robust solenoid valve box
- Air exhaust facility in clutch bell housing

Foot Brake Valve

The ProVia foot brake valve (FBV) is used for precise pressurisation and purge of pneumatic dual-circuit braking systems, actively controlling the braking process. It works in harness with actuating mechanisms across an extensive range of commercial vehicles. It is designed to secure both air circuits, allowing the vehicle to be operated safely at all times.

Key Features

- Long durability and high corrosion resistance, proven in the 96h Neutral Salt Spray Test
- Pressure predominance of Circuit One versus Circuit Two is 0.15 bar to 0.3 bar
- Total travel until stop is available from 12.5 mm to 15 mm
- Meets performance standard ECE-R13
- In addition to ECE-R13, the FBV undergoes diverse additional assessments including a 96 h Neutral Salt Spray Test

Hand Brake Valve

Through ProVia's hand brake valve a sensitive graduated actuation of the auxiliary brake and operation of the parking brake system is enabled. Active braking control is possible based on a precise air pressure regulation in a dual-circuit brake system. By gradually releasing the air from the connected Tristop™ or spring brake actuators the hand brake valve enables a controlled deceleration of the vehicle.

Key features

- Pressure levels in all circuits are kept in tolerance during whole device life-time
- Reliable operating lifetime, reducing replacement rates
- Strong corrosion resistance
- Thermal operating range: -40 °C to 80 °C

ProVia™

Relay Valve

Relay valves rapidly increase or decrease the pressure of compressed air and shorten the response and pressure build-up times in air braking systems. Relay valves not only help to rapidly pressurize the brake cylinders, but also act as quick-release valves when the brakes are released.

Key Features

- With a range of 11 variants today, ProVia is able to serve around 70 OEM references
- Snap fit silencer
- Exhaust spout is part of the lower body for silencer fitment in field if required
- Thermal range: -40 °C to +80 °C

Trailer Release Valve

The ProVia trailer release valve (TRV) releases the brakes on an uncoupled trailer, allowing it to be moved independent of the tractor unit. The TRV has been designed as a cost-effective alternative to OE components with no compromise on safety. It is available in a range of variants, designed for compatibility with a wide choice of OE systems.

Key Features

- Release function to move an uncoupled trailer
- High corrosion resistance, proven in the 96 h Neutral Salt Spray Test
- Long-life durability compared to budget alternatives
- Robust design, highly reliable

* Average low specification alternative product

Relay Emergency Valve

A ProVia relay emergency valve (REV) controls a two-line trailer brake system actuated by the braking system of the tractor. The product controls the emergency brake function, triggering automatic trailer braking when a partial or total pressure drop is detected in the supply line.

Key Features

- Release function to move the trailer manually
- Automatic braking function in case of supply line evacuation or tractor/trailer disconnection
- High corrosion resistance, as demonstrated in the 96 hours Neutral Salt Spray Test
- Highly reliable, long-life durability compared to budget alternatives
- Meets performance standard ECE-R13

ProVia™

Wheel Speed Sensor

A wheel speed sensor (WSS) is a device designed to read the speed of a vehicle's wheel rotation. The system also monitors the proper functioning of a range of features, including brake performance, ensuring vehicle safety. ProVia wheel speed sensors are contactless and use alternating voltage outputs to correspond to the actual wheel speed rotation, passing the information to the vehicle's electronics system.

Key Features

- A short coil twist design ensures reduced noise generated to the ECU which avoids malfunction
- A robust crimped connection between sensor head and cable
- Performs reliably in temperatures up to 150 °C

Standards & Quality

- Mounting: Standard Head Dimensions
- Interface: Standard End Connectors
- Thermal range: coil area: -40 °C ... +200 °C
sensor head: -40 °C ... +150 °C
sensor cable: -40 °C ... +180 °C
end connector: -40 °C ... +80 °C

ECAS Solenoid Valve

In Electronically Controlled Air Suspension, Solenoid valve is the interface between electronic output signals from the electronic control unit and the pneumatic actuating signals for the air suspension bellows.

Key Features

- Temperature range: -40 °C to +80 °C
- Working pressure: 5 – 13 bar
- Interface: electric connection type, pneumatic connection type, mounting screws position
- All variants (except PRO 412 004 0 and PRO 412 005 0) with silencer

Standards & Quality

- Port thread M22×1.5 according Voss 230 standard
- Electric pinned connectors according to DIN 72585 standard

Feature	OE Original	ProVia	Aftermarket Average*
Leakage -40 °C (cm ³ /min)			
Leakage +80 °C (cm ³ /min)			

* Average low specification alternative product

Replacement of ECAS1 valves by ProVia ECAS3 valves

Overview of repair kit types

A smooth changeover from an ECAS1 to an ECAS3 valve requires specific repair kits. You would need up to 3 repair kits to assure proper integration of the ECAS3 valve in the ECAS system of a vehicle. The repair kit types are shown below, grouped by their function.

Solenoid valve connection

Repair kits are used to enable the transition from a M27 single solenoid type (ECAS1) to DIN bayonet solenoids (ECAS3).

Electrical connection

Repair kits assure the proper electrical port connection.

Repair kit 894 601161 2 works as an extension and sets the pin assignments in the appropriate way.

Repair kit 472 880 931 2 – without extension – also converts the pin assignment in a socket.

Voss connection

Specific ECAS1 variants have a M16×1.5 Voss pneumatic supply port while the ECAS3 are equipped with an M22×1.5 Voss port. The repair kits enable a reduction from M22×1.5 to M16×1.5 and assure tightness. The existing pneumatic connection of the vehicle can be used.

472 880 932 2
Voss adapter, 2x o-rings (M22×1.5 / M16×1.5), washer

472 880 933 2
Voss adapter, o-ring (M22×1.5)

Pneumatic connection

Specific ECAS1 valves have standard metric threads on all air ports while all ECAS3 valves have Voss metric connector threads. For these valves, the repair kit 472 900 931 2 must be used to make the air connection tight.

472 900 931 2
4x o-rings

ECAS Distance Sensor

In Electronically Controlled Air Suspension (ECAS), a distance sensor, connected to its axle via a lever arm, monitors the distance between the axle and the vehicle body, reporting to the ECU via sensor cable. This is the starting point in the electronic truck stability control process.

Key Features

- Precision rotary movement of the armature
- Adapted to operate from either side of the vehicle
- Three cross lever and one straight lever variants available
- Supply Voltage: PULSE 8 – 16 V DC
- Current consumption: max. 90 mA
- Electrical connection: Bayonet ISO 15170
- Thermal range: -40 °C to +80 °C
- Protection according to ISO 20653: IP 6K9K

ProVia number	Type of lever	Tolerance of characteristic curve
PRO 412 030 0	Straight lever	-
PRO 412 031 0	Cross lever	$t_{+50^{\circ}} - t_{0^{\circ}} = 150 \pm 8 \mu s$
PRO 412 032 0	Cross lever	$t_{+50^{\circ}} - t_{0^{\circ}} = 146 \pm 4 \mu s$
PRO 412 033 0	Cross lever	$t_{+50^{\circ}} - t_{0^{\circ}} = 142 \pm 8 \mu s$

Coiled & Straight Tubes

ProVia coiled tubes are applied to pneumatic braking systems as a flexible connection between the towing vehicle and semi-trailer

About

- A multilayer coiled tube
- The external layer of PA12 provides resistance to particular hazardous factors and works as a wear indicator
- Reduced complexity as ProVia variants are compatible with a wide range of OE systems

Key Features

- Anti-kink part to prevent damaging coil
- Brass fittings
- Thermal range: from -40 °C to +100 °C

Standards

- All ProVia tubes fulfill the ISO7628 standard
- In addition coiled tubes are certified according to ISO7375

Coupling Head

Enables the pneumatic connection between a truck and trailer. Delivers the ability to connect two separate lines of supply and control, preventing incorrect coupling

About

- Performance standard ISO 1728
- Simplified body design resistant to harsh weather conditions
- Robust cover protecting against dust

Truck

- Automatic
- M16×1.5
- Supply + Service Line
- Yellow + Red
- With valve

Trailer

- Standard
- M16×1.5
- Supply + Service Line
- Yellow + Red

ProVia number	Vehicle type	Standard	Cover	Port	Remark

Electrical Accessories

ProVia's electrical accessory product range offers a comprehensive selection of solutions for connecting truck and trailer. The ProVia range includes sockets, plugs, adapter cables and 7-pole and 15-pole cables.

Key Features

- Compatible with ABS (5-pole) & EBS (7-pole)
- Adapter cable allows connection from 15-pole to 2× 7-pole
- Screwed sockets with clear identification of pins, no special tools required for fitting
- Cables:** 3.5 m working length; anti-kink protection; made from robust polyurethane
- Sockets:** screw terminals and colour coding for easier wiring
- Plugs:** seal protected

Standards & Quality

- Complete ProVia electrical accessory range is ADR/GGVS certified
- Operating range of -40 °C to +80 °C
- Coiled cable ABS/EBS 7-pole, socket 7-pin and plug 7-pole meet ISO 7638 standard
- Coiled cable 15-pole, adapter cable, socket 15-pin and plug 15-pole meet ISO 12098 standard
