

RANGE EXTENSION

WHEEL SPEED SENSORS

Our new range includes 9 variants which cover 9 OEM applications and 1 extension cable covering 1 OEM application.

A wheel speed sensor (WSS) is a device designed to read the speed of a vehicle's wheel rotation. The system also monitors the proper functioning of a range of features, including brake performance, ensuring vehicle safety. ProVia wheel speed sensors are contactless and use alternating voltage outputs to correspond to the actual wheel speed rotation, passing the information to the vehicle's electronics system.

FEATURES

- A robust crimped connection between sensor head and cable
- Provides high temperature stability and resistance to vibration
- Designed to operate reliably even in tough conditions
- Capable of determining vehicle speed down to 0 km/h
- Mounting: Standard Head Dimensions
- Interface: End Connectors (same as OEM)

APPLICATIONS

Our new range includes 9 variants which cover 9 OEM applications for Mercedes-Benz, Scania, Renault, and Volvo and 1 extension cable covering 1 OEM application for Volvo.
